2 Overview of Pay.gov

Pay.gov offers four major services:

1. The *Collection Service* collects and processes agency transactions, including collections originating from an agency web page, collections originating from a form hosted on the Pay.gov public user interface, or collections in response to a bill notifying users of a required payment. Agencies may also use the collections control panel (CCP) to manually enter transactions in Pay.gov.
As part of the Collections Service, the *Trusted Collection Service* allows agencies to send non-interactive collections transactions, and retrieve transaction data using 2048-bit SSL encryption, certificate-based authentication, and web services. Please contact your Bureau of the Fiscal

- Service representative or Pay.gov Customer Service if you are interested in using Trusted Collection Service.
2. The *Forms Service* hosts agency forms, which can be configured to closely emulate their paper counterparts, including OMB and agency control numbers, Paperwork Reduction Act and Privacy Act notices, and instructions.
 3. The *Billing Service* allows agencies to send payment due notifications by email, which include links directing users to the Pay.gov billing page, where the information can be reviewed and payment can be made. This service is maintained for existing agency billing implementations. New billing implementations should use the eBilling Service.
 4. The *eBilling Service* uses a certificate and Web services to allow agencies to set up billing accounts, send notices of payment due, and control billing account access. Agencies can use the service when needed and Pay.gov processes their requests upon receipt.
 5. The *Reporting Service* provides online reports and downloadable activity files which allow agencies to reconcile transactions with reports from other financial applications such as the Collection Information Repository (CIR) or plastic card settlement agents.

3 Pay.gov 6.1 Enhancements and Changes

This section summarizes the major enhancements and changes included in this Pay.gov release.

3.1 Security

- Designation of Security Contacts form has been revised. The updated PDF form is available on the Pay.gov Documentation website.

3.2 Reporting

- Data submitted to CIR for all plastic card transactions includes plastic card product type, AVS response code, Approval Code and CVV2 result code.

3.3 TCS Online

- Pay.gov payment pages used by TCS Online enhanced to match the responsive design of the public user interface introduced in release 6.o.

3.4 Collections

- Plastic Card transactions support added for Visa Infinite program.

3.5 Public User Interface

- Corrected typos in online help.

3.6 Email Notification

- Form Submission Notification email revised to include Transaction Amount and the order of data has been rearranged.

4 Customer Service

Customer service is provided by the Federal Reserve Bank of Cleveland. Assistance with accessing the website, hosted forms processing, collections, and so on is provided for agency customers. Technical support is also available for problems such as balancing payments, database integrity, information security, and other issues relating to the smooth operation of the services provided to agencies.
